

ABSTRACT OF THE DISCLOSUREVIDEO AND AUDIO INFORMATION PROCESSING

5 A camera-recorder apparatus comprises an image capture device operable to
capture a plurality of video images; a storage medium by which the video images are
stored for later retrieval; a feature extraction unit operable to derive image property
data from the image content of at least one of the video images substantially in real
time at the capture of the video images, the image property data being associated with
10 respective images or groups of images; and a data path by which the camera-recorder
apparatus is operable to transfer the derived image property data to an external data
processing apparatus.
